

WISE & STRONG

KIRUNA UTILITY VEHICLES

CUSTOMISED VEHICLES FOR STEELWORKS AND SMELTERS

Kiruna Utility Vehicles develops and manufactures customised vehicles for steelworks and smelters.

Among our products are:

- Slag Haulers
- Coil Carriers
- Container Handlers
- Tractors and Trailers

Slag Hauler SLV 100

WELCOME TO KIRUNA UTILITY VEHICLES

Our products are used at steelworks and smelting plants around the world and in our vicinity.

We deliver to companies that are known to place the highest demands on technology and efficiency, and on achieving a life-cycle economy. Many of our trucks are still in operation after more than 20 years of service and 30-40,000 hours of hard work.

"Many of our trucks are still in operation after more than 20 years of service and 30-40,000 hours of hard work."

PRODUCTS:

TRACTORS AND TRAILERS:

Kiruna UV T25 Trailer Tractor

When an ordinary trailer tractor suffers from its limitations we can offer you a solution. The Kiruna UV T25 offers you grading capacity and off road capabilities. When you combine this with long lifecycles, the conclusion is a unique vehicle cheaper and more versatile than any other solution.

T25 combined with a low lifting pallet trailer makes a useable multi purpose transport solution for plate manufacturers.

Trailer Tractor T25

Kiruna UV Slag Trailer SLT 35

SLT 35 is a special designed trailer that shall be towed by a terminal tractor or similar. It is used for transporting and handling of liquid slag in slag pots. The trailer is designed for running on even and hard roads.

Kiruna UV PT 180

Articulated, elevating transporter for long, flat and heavy materials. The Kiruna PT (Platform Trailer) is a load support-based transporter with elevating loading platform. A stable rear car enable the PT to work with simple, cost-saving load supports and more than 10 000 square meters of workshop space.

COIL CARRIERS:

Kiruna UV CC 60

Articulated, single-purpose truck for coils size 1050 to 2250 mm. Self-loading and unloading, the KIRUNA UV CC 60 is designed to lift, transport and stack coils directly by eye. With excellent visibility and gentle handling the benefits of this vehicle are minimum damage and increased safety.

Coil Carrier CC 60

MAXIMUM DRIVER SAFETY

We are continuously developing our trucks for maximum driver and operating safety. The driver's cabin is designed to be a safe and comfortable workspace that is optimally soundproofed and equipped with a highly developed cab suspension system.

FIRE PREVENTING DESIGN

To minimise the risk of tyres catching fire through contact with spilled materials, the rear wagon of our Slag Haulers have a fire preventing design.

Among the companies that use our vehicles are:

- Jiangxi Copper, China
- Posco Steel, South Korea
- Boliden, Sweden
- Boliden, Finland
- SSAB, Sweden

CONTAINER HANDLERS:

Kiruna UV Elevating Combi Trailer

Articulated, elevating transporter for long, flat and heavy materials. The Kiruna CT (Combi Trailer) is a load support-based transporter with elevating loading platform. Articulation, a large stability triangle area and a stable rear car enable the CT to work with simple, cost-saving load supports.

Elevating Combi Trailer CT

Kiruna UV U-Frame Container System

Kiruna Combi – articulated U-frame truck for bulk materials handling. The KIRUNA COMBI is used with two or more containers for non-stop haulage. While the empty container is being filled by the loader, the COMBI takes the laden one to the dumping site. Both loader and truck are utilized optimally. Switching containers takes less than a minute. The KIRUNA COMBI is able to transport a variety of materials on custom-built load carries. Options provided on request.

SLAG HAULERS:

Kiruna UV SH 60

Articulated, single-purpose truck for molten slag handling. The Kiruna SH 60 is performance-designed to accommodate any individual slag pot. It lifts, transports, pours and skulls the pot without outside help. The pot is picked up from the ground, a transfer car or a platform and can be inverted 180°. Can be delivered with Slag Pot – a complete solution.

Slag Hauler SH 60

Kiruna UV SLV100

Heavy load capacity slag hauler with modern life cycle cost taken into consideration during design phase. Frame structure is made to withstand 30 years in heavy duty operation. The pot is picked up from the ground, a transfer car or a platform and can be inverted 180°.

"In order to meet the most demanding international environmental standards, we use modern diesel engines with AdBlue® Diesel Technology."

PARTS & SERVICE:

We know how important it is to secure the operability of your vehicles.

The Kiruna UV Parts & Service team is committed to meeting the needs and expectations of our customers around the world. Our ambition is to provide the best possible service in our fields of operation.

Proud of our history, we still carry a well-equipped stock of spare parts for older vehicles that were manufactured for steelworks and smelters by Kiruna Truck or GIA.

For logistical reasons, our spare parts organisation and warehouse is located in Luleå, by the Baltic Sea.
